

## Topic 22

-----

This initial assessment was suitable option for me to begin my treatment.

-----

I have only had the initial assessment so far however the therapist was lovely and advised me of the appropriate options applicable to me in detail. Thank you.

-----

The care given by the nursing team and Marie Currie nurses was exemplary. They always showed such kindness and respect towards my mum. Their knowledge and expertise in 'end of life care' gave me the confidence to care for my mum at home until she died.

The care package from when XXXX first visited was provided quickly and efficiently and was a completely appropriate to meet my mums needs throughout the last week of her life. As a retired nurse myself working in the NHS for 37 yrs and my husband a retired doctor we obviously have a good knowledge of the NHS. We would definitely recommend your service to anyone in similar circumstances caring for a loved one at home requiring end-of-life care. My mum's death could not have been any better. When mum died on Saturday, XXXX and XXXX returned to complete the last 'offices'. This enabled my mum to leave her beloved bungalow in a dignified way and I will be forever grateful to them for this. With much appreciation.

-----

District Nurse Sharon came to my father's house (ADDRESS REDACTED) last DATE REDACTED as my father had a blocked catheter. Her kindness, professionalism and efficiency could not be bettered. She was so helpful and sorted out the problem so quickly. I can't praise her enough. Sadly we never knew her surname but I do hope she sees this feedback.

-----

Explain the real problems to one and not to discharge to quickly. Still awaiting results for my CT scan & MRI scans.
